

RoHS Identification Instructions 2025

YAGEO Group is a leading global supplier of electronic components and assemblies. We offer our customers the broadest selection of capacitor, resistor, magnetics, and sensor technologies in the industry.

For military, aerospace, and some commercial applications, it is necessary and/or required to design and manufacture a selection of YAGEO Group components with tin-lead (Sn-Pb) terminations, which may be subject to Directive 2011/65/EU of the European Parliament and of the Council of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment (“RoHS”).

RoHS compliance information may be obtained from the component labels, the shipping documents, and/or Specsheets and Datasheets found on the YAGEO Group website:

<https://www.yageogroup.com>

Additional RoHS information may be found here:
