

C0402C309C5GACTU

General Information

Series

Style

Description

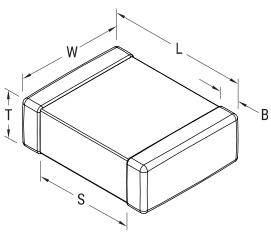

Aliases (C0402C309C5GAC7867) SMD Comm COG, Ceramic, 3 pF, +/-0.25 pF, 50 VDC, COG, SMD, MLCC, Ultra-Stable, Low Loss, Class I, 0402, 0.3 mm

SMD Comm COG

SMD, MLCC, Ultra-Stable, Low

SMD Chip

Loss, Class I

+ 1/4			
T M	Click here for the 3D model.	Features	Ultra-Stable, Low Loss, Class I
<u> </u>		RoHS	Yes
		Termination	Tin
		Marking	No
·		AEC-Q200	No
		Typical Component Weight	1.06 mg
		Shelf Life	78 Weeks
		MSL	1
nensions		Specifications	
p Size	0402	Capacitance	3 pF

Dimensions				
Chip Size	0402			
L	1mm +/-0.05mm			
W	0.5mm +/-0.05mm			
Т	0.5mm +/-0.05mm			
S	0.3mm MIN			
В	0.3mm +/-0.1mm			

Packaging Specifications		
Packaging	T&R, 180mm, Paper Tape	
Packaging Quantity	10000	

Specifications				
Capacitance	3 pF			
Measurement Condition	1 MHz 1.0Vrms			
Tolerance	+/-0.25 pF			
Voltage DC	50 VDC			
Dielectric Withstanding Voltage	125 VDC			
Temperature Range	-55/+125°C			
Temp. Coefficient	COG			
Capacitance Change with Reference to +25°C and 0 VDC Applied (TCC)	30 ppm/C, 1MegaHz 1.0Vrms			
Dissipation Factor	0.1% 1 MHz 1.0Vrms			
Aging Rate	0% Loss/Decade Hour			
Insulation Resistance	100 GOhms			

Statements of suitability for certain applications are based on our knowledge of typical operating conditions for such applications, but are not intended to constitute - and we specifically disclaim - any warranty concerning suitability for a specific customer application or use. This Information is intended for use only by customers who have the requisite experience and capability to determine the correct products for their application. Any technical advice inferred from this Information or otherwise provided by us with reference to the use of our products is given gratis, and we assume no obligation or liability for the advice given or results obtained.

C0402C309C5GACTU

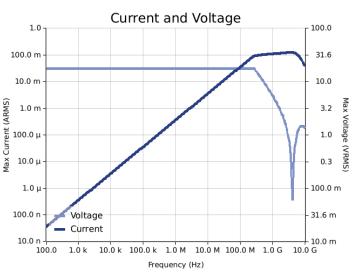

Aliases (C0402C309C5GAC7867) SMD Comm COG, Ceramic, 3 pF, +/-0.25 pF, 50 VDC, COG, SMD, MLCC, Ultra-Stable, Low Loss, Class I, 0402, 0.3 mm

These are simulations.

This is not a specification!

The responses shown represent the typical response for each part type. Specific responses may vary, depending on manufacturing variation affects of all parameters involved, including the specified tolerances applied to capacitance and unspecified variations of ESR, ESL, and leakage resistance.

The responses shown do not represent a specified or implied maximum capability of the device for all applications.

- The ESR used for ripple "Ripple Current/Voltage vs. Frequency" plots is the ESR at ambient temperature.

- The ESR used for ripple Ripple Currenty voltage vs. Frequency plots is the ESR at ambient temperature.
 The ESR in the "Temperature Rise vs. Ripple Current" plots is adjusted to each incremental temperature rise before the power and ripple current is calculated.
 The effects shown herein are based on measured data from a multiple part sample of the parts in question.
 Ripple capability of this device will be factored by thermal resistance (Rth) created by circuit traces (addi affects of all parameters involved, including the specified tolerances applied to capacitance and unspecified variations of ESR, ESL, and leakage resistance.
 The peak voltages generated in the "Temperature Rise vs. Combined Ripple Currents" plot are calculated for each frequency and are not combined with voltages
- generated at any other harmonics.

 Please consult with the catalog or field applications engineer for maximum capability of the device in specific applications.

All product information and data (collectively, the "Information") are subject to change without notice.

KEMET K-SIM is designed to simulate behavior of components with respect to frequency, ambient temperature, and DC bias levels. The responses shown represent the typical response for each part type. Specific responses may vary, depending on manufacturing variation effects of all parameters involved, including the specified tolerances applied to capacitance and unspecified variations of ESR, ESL, and leakage resistance.

All Information given herein is believed to be accurate and reliable, but is presented without guarantee, warranty, or responsibility of any kind, expressed or implied. Statements of suitability for certain applications are based on our knowledge of typical operating conditions for such applications, but are not intended to constitute – and we specifically disclaim – any warranty concerning suitability for a specific customer application or use. This Information is intended for use only by customers who have the requisite experience and capability to determine the correct products for their application. Any technical advice inferred from this Information or otherwise provided by us with reference to the use of our products is given gratis, and we assume no obligation or liability for the advice given or results obtained.
